

Movement — Revised Operator & Supervisor Flow

Ad-hoc direct movement (no task needed) · Supervisor task creation via form or Excel

FEATURE 1 Ad-hoc Direct Movement

Operator can start a movement on their own — no pre-created task — with the same scans & validations. A toggle switches between moving a single item or an entire bin.

1 Start From The List

Item Movement

MOV-3001

Replenishment · Bulk → Pick

BULK16-02 › PICK01-A1

MOV-3002

Consolidation · Merge bins

BULK10-14 › PICK02-B3

BMV-4001

Bin move · Bulk → Bulk

BULK16-02 › BULK10-14

The new “+” button. Alongside system tasks, the operator taps + in the header to begin a movement directly, on their own initiative.

2 Choose Item or Bin

← Cancel

New Movement

Ad-hoc

Item Movement

Bin Movement

SCAN FROM BIN

Scan or type source bin...

Auto

A single toggle decides the flow: move one **item**, or relocate a whole **bin**.

One screen, two modes. Toggle at the top switches between Item and Bin movement before the first scan.

3 Item Mode · Scan & Confirm

← Back

New Movement

Item · Step 4 of 4

↑ FROM

BULK16-02

↓ TO

PICK01-A1

boAt Airdopes 141 TWS Earbuds

Item scanned

50

BATCH

BTH-AD141-0423

SYSTEM

Confirm movement

Operator-driven, fully validated. From-bin → to-bin → item → quantity. Wrong scans are blocked; batch/expiry stay system-populated.

4 Bin Mode · Scan Source

← Cancel

New Movement

Bin · Step 1 of 3

Item Movement

Bin Movement

SOURCE LOCATION

SCAN SOURCE LOCATION

Scan source location...

Auto

Bin toggle selected. Operator scans the source location, then the bin barcode — the whole bin moves as one unit.

5 Bin Mode · Scan Destination

← Back

New Movement

Bin · Step 3 of 3

↑ FROM

BULK16-02

↓ TO

BULK10-14

BIN

BIN-A12-402

SCANNED

DESTINATION LOCATION

SCAN DESTINATION DIRECTLY

BULK10-14

Auto

Confirm bin movement

Faster bin moves. After the bin is scanned the operator scans the destination **directly** — the old item-by-item contents confirmation step is removed.

6 Done

Movement completed successfully

Item Movement

MOV-3002

Consolidation · Merge bins

BULK10-14 › PICK02-B3

BMV-4002

Bin move · Inward → Bulk

RX-LPN-204 › BULK09-13

Committed on the spot. A success toast confirms the ad-hoc move — no task was ever required. The operator returns to the list, ready for the next action.

FEATURE 2 Supervisor Task Creation

A separate supervisor screen to create the movement tasks operators execute — one at a time via a form, or in bulk via an Excel / CSV upload.

1 Create Via Form
